Optional parts not included in kit.			
AD-397	2	Transmission Dowel	.5000 x 1.000
All components should be assembled per O.E.M. recommendations.			

The "Engine Hardware Finishing Kits" are provided to help eliminate searching for misplaced parts, while providing fresh new parts to meet or exceed O.E.M. specifications.

These kits are researched and designed for the most popular applications. To avoid extra spare parts and cost to the installer, some deviation may occur due to suggestions by nationwide rebuilders and O.E.M. changes in production. We rely on our customers for additional feedback in order to provide you with the most complete part kit available.
